This video is a transcript of an interview with Lee, who discusses his book about Harry Dalton, a prominent figure in Major League Baseball. The interview begins with the date and setting, and Lee explains his motivations for writing the book, which include his personal fandom for the Milwaukee Brewers and a desire to engage with his history degree after experiencing a significant health issue.

Lee delves into Harry Dalton's life, highlighting his journey from a sports writer and military officer to becoming a successful baseball executive. Dalton is recognized for revolutionizing the role of the general manager in baseball, focusing on team building and specialization in talent evaluation. He is credited with significant trades that brought key players to teams, contributing to their success, especially with the Baltimore Orioles and Milwaukee Brewers.

Throughout the interview, Lee emphasizes Dalton's collaborative management style, his positive interactions with players, and his contributions to the sport that extend beyond winning—such as improving player welfare during crises like the cocaine problem in the 1980s.

The discussion also touches on Dalton's legacy, with Lee arguing that he should be considered for the Hall of Fame due to his substantial impact on the game and the careers he helped shape. Overall, the interview serves to highlight the importance of Dalton's influence in modern baseball and the values he represented as an executive.
